

# **TECHNICAL DATA SHEET**

CyFlow™ CD361 Purified Anti-Hu; Clone MEM-216

BT182387

# For Research Use Only. Not for use in diagnostic or therapeutic procedures.

## **Specifications**

Antigen	CD361
Alternative Names	EVDB, D17S376, EVI2B
Clone	MEM-216
Clonality	monoclonal
Format	Purified
Host / Isotype	Mouse / IgG1
Species Reactivity	Human
Negative Species Reactivity	_
Quantity [Concentration]	0.1 mg [ 1 mg/ml ]
Immunogen	Raji cells: human Burkitt's lymphoma cell line

# **Specificity**

The mouse monoclonal antibody MEM-216 recognizes CD361 antigen, almost uncharacterized type I transmembrane protein with broad leukocyte expression, mostly in myeloid and B cells.

#### **Contact Information:**

Sysmex Partec GmbH • Am Flugplatz 13 • 02828 Görlitz • Germany Tel +49 3581 8746 0 • Fax +49 3581 8746 70 • E-mail: <u>info@sysmex-partec.com</u>

Rev 1.0 Date: 2016-07-15 EN CyFlow™ CD361 Purified

#### **Application**

Based on published sources, this antibody is suitable for the following applications:

- · Flow cytometry
- · Immunoprecipitation

#### **Storage Buffer**

The reagent is provided in phosphate buffered saline (PBS) solution, pH ≈7.4, containing 0.1% (w/v) sodium azide.

### Storage and Stability

Storage	Avoid prolonged exposure to light. Store in the dark at 2-8°C. Do not freeze.
Stability	Do not use after expiration date stamped on vial label.

#### **Background Information**

CD361 (EVI2B; Ecotropic Viral Integration site 2B or EVDB), is a poorly characterized type I transmembrane protein, expressed from one of three genes embedded in intron 27b of the neurofibromatosis type 1 (NF1) gene. The DNA strand that is transcribed to produce CD361 is the complementary one to the strand encoding NF1. Murine homolog to human CD361 is associated with ecotropic viral insertions, which have been implicated in the expression of murine myeloid leukemias. CD361 has been also reported to be involved in melanocyte and keratinocyte differentiation. However, it is expressed mainly in peripheral blood and bone marrow.
