

## **TECHNICAL DATA SHEET**

CyFlow™ CD86 Low Endotoxin
Anti-Ms; Clone GL-1

BF446321

# For Research Use Only.

Not for use in diagnostic or therapeutic procedures.

#### **Specifications**

Antigen	CD86				
Alternative Names	B70, B7-2				
Clone	GL-1				
Clonality	monoclonal				
Format	Low Endotoxin				
Host / Isotype	Rat / IgG2a				
Species Reactivity	Mouse				
Negative Species Reactivity	_				
Quantity [Concentration]	0.1 mg [ 1 mg/ml ]				
Immunogen	LPS-activated CBA/Cs mouse splenic B cells				

## **Specificity**

The rat monoclonal antibody GL-1 recognizes CD86 antigen, a 70-80 kDa type I transmembrane glycoprotein of immunoglobulin supergene family, expressed on professional antigen-presenting cells, such as dendritic cells, macrophages or activated B lymphocytes.

#### **Contact Information:**

Sysmex Partec GmbH • Am Flugplatz 13 • 02828 Görlitz • Germany Tel +49 3581 8746 0 • Fax +49 3581 8746 70 • E-mail: <u>info@sysmex-partec.com</u>

## **Application**

Based on published sources, this antibody is suitable for the following applications:

- Flow cytometry
- · Immunoprecipitation
- Immunohistochemistry (frozen sections)
- · Immunocytochemistry
- · Functional assays

### **Storage Buffer**

The reagent is provided in azide-free phosphate buffered saline (PBS) solution, pH  $\approx$ 7.4; 0.2 µm filter sterilized. Endotoxin level is less than 0.01 EU/µg of the protein, as determined by the LAL test.

### Storage and Stability

Storage	Avoid prolonged exposure to light. Store in the dark at 2-8°C. Do not freeze.			
Stability	Do not use after expiration date stamped on vial label.			

### **Background Information**

CD86 (B7-2) and CD80 (B7-1) are ligands of T cell critical costimulatory molecule CD28 and of an inhibitory receptor CD152 (CTLA-4). Both B7 molecules are expressed on professional antigen-presenting cells and are essential for T cell activation, both molecules can also substitute for each other in this process. The question what are the differences in CD80 and CD86 competency has not been fully elucidated yet; there are still conflicts in results about their respective roles in initiation or sustaining of the T cell immune response.
